

**Some adults may wonder why more and more children are starting to see chiropractors.**

**That's a good question and the answer is simple: whether we have a large spine or a little spine, if that spine is creating nerve distress then our magnificent bodies may not operate smoothly...**

The nervous system is the 'Master Controller'

The nervous system is the master controller of our body and if it's communication channels become fuzzy, distorted, or damaged, then we experience all sorts of communication errors. For babies and children, this ineffective communication may play out as colic or irritability, an inability to suckle and breastfeed, poor sleep, developmental delays, digestion issues, asthma, behavioral problems, low energy, inability to concentrate, headaches, etc – the list is endless. In fact, regardless of what the end result or symptom may be, all roads lead back to the body's ability to self-regulate and function at a peak level.

While chiropractic may be able to help with several health issues, our focus is not treating or curing ailments; our focus is ensuring the nervous system has every opportunity to work efficiently and effectively.

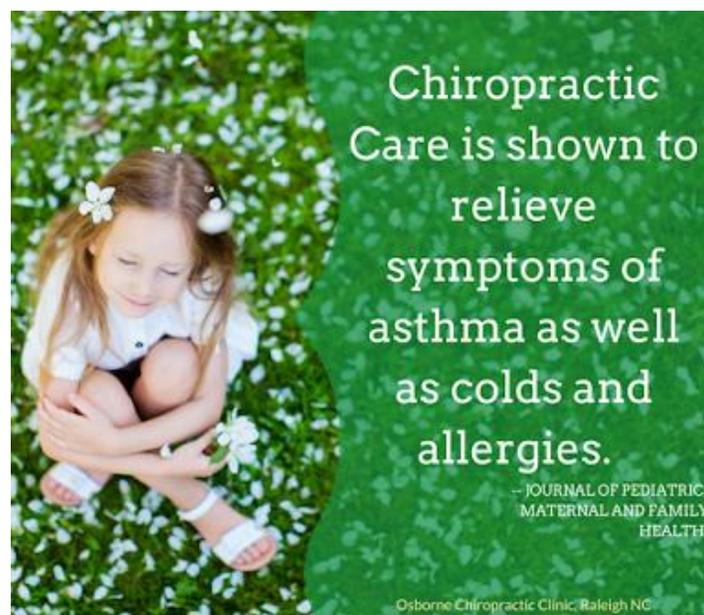

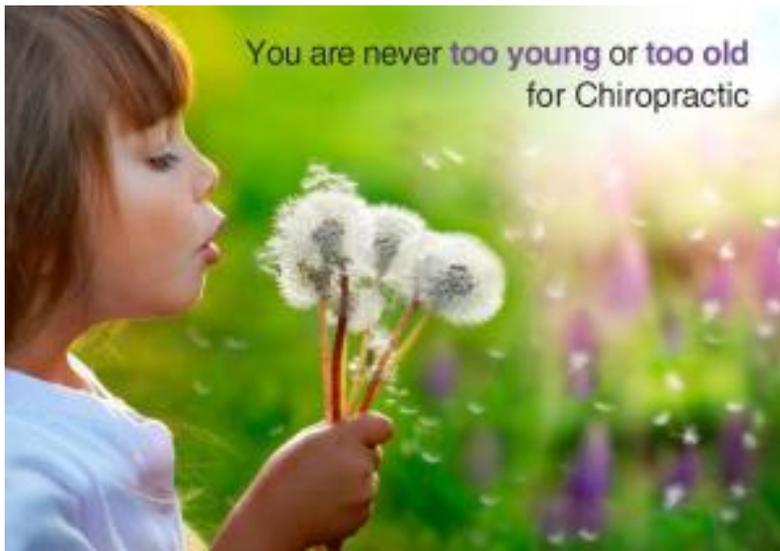

Another question you may ask is...

"How do little kids get nerve irritation?"

Nerve irritations (or vertebral subluxations) occur as a part of normal daily life. They result from physical, chemical and emotional stressors or 'insults' to our health, such as bad posture, prolonged postures, sleeping on the tummy, knocks and falls, poor food choices, dehydration, exposure to chemicals and toxins, and stress and anxiety. Even before these lifestyle stressors have an impact, nerve irritation can occur in the uterus

from awkward positioning, restriction of movement, and exposure to toxins, and from birth complications such as long labors, very fast labors, or forceps or caesarean delivery.

When we appreciate how important the nervous system is and how easily it can be hindered and impaired it makes sense that more parents are having their child's spine and nervous system assessed.

# 10 REASONS Your Child Should Get CHIROPRACTIC ADJUSTMENTS

1. To maximize their child's neural plasticity (brain and nerve development)
2. To enhance their child's overall health and wellbeing
3. To strengthen immunity and reduce the incidence of colds, ear-infections, ear-aches and general illness
4. To help with colic and Irritable Baby Syndrome
5. To help with asthma, breathing difficulties and allergies
6. To improve spinal posture
7. To improve their child's ability to concentrate
8. To assist with behavioral disorders and enhance emotional wellbeing
9. To help alleviate digestive problems
10. To assist with bed wetting and sleep issues

Your child's health is their greatest asset. In our office, we utilize the skill and knowledge of homeopaths, Chinese medicine practitioners, chiropractors and wellness-oriented physicians. I urge you to explore all possibilities you have to strengthen your child's health.

### Please tell us about your health success story.

Please let us share your story with other patients and tell them how Chiropractic has helped you with similar problems.

The main reason I came to see Dr. Terry and/or Dr. Andy was for problems with:

digestion, general wellness, congestion

The date of my initial visit was:

Many toddlers have issues with digestion/constipation, but since she gets regular adjustments, Serena has very healthy digestion. Her immune system is very strong - she rarely gets sick, even though she is in preschool! Adjustments always help to knock out illness before it has a chance to develop into something serious.

The main reason I came to see Dr. Terry and/or Dr. Andy was for problems with:

general good health / congestion

The date of my initial visit was: \_\_\_\_\_

Since getting regular adjustments, Danika's immune system has been amazing! As soon as I notice any symptoms of impending illness, I bring her in for an adjustment + she recovers very quickly. It helps to drain any congestion, so we never have issues with sinus or ear infections.
